- Intensive course built to provide essential skills for Jr. Web Developers.
- Ruby development tested with TDD. Agile Development, and hosted live on Heroku.
- Ruby, Javascript, jQuery – with a focus on Ruby HTML & CSS – Bootstrap -
- Able to launch apps with functional user facing design.

28dayhug.com - Business Website - rails-28dayhug.herokuapp.com

28dayhug.com is a month subscription site to receive little packages once a month. The outline of the project was to take a site using Wordpress, build it back up in a Rails app, add User interface and profiles, and integrate a payment processor. The feature I got to work on was integrating a payment processor using Stripe. I had no prior experience with payment processing before the project and by the end of the project I could build customers, charges, and subscriptions.

ENSearch - Music Search Engine - ensearch.herokuapp.com

ENSearch is a side project I'm building in my free time to help myself with understanding Rails more. I'm using Rails on the back end and AngularJS on the front end.

DotaMeter.com - Site for Stat Statistics - DOTAMeter.com

DotaMeter.com is a statistic site for the computer game DOTA 2.

Hack-n-Help

SW Hack-n-Help Coordinator

June 2013 - Present

Take over the organizing and coordinating of the SW Hack-n-Help at Lucky Labs in Multnomah Village. Offering a time for everyone of all languages to come together and hack.

Albertsons

Service Supervisor

April 2008-Present

Balance cash drawers, complete cash accountability procedures and POS management functions. Provide a customer satisfaction experience to a diverse customer base. Constructively handle difficult customer situations while still conforming to company policies and procedures.

Target

Team Leader

Nov 2005- Sept 2009

Lead a fast, fun, and friendly team. Coach and evaluate team member performance. My team met production deadlines on a daily basis. Responsible for delivering high quality customer service to ensure their returning business.
