Stripe	*FactoryGirl*	*Zsh/Pry*
JSON	*Capybara*	*Bootstrap/HTML5/CSS*
Mechanize/Nokogiri	*Faker*	*Chrome Dev*
MySQL/Postgresql/Mongo	*Symetrics*	*HAML*

Portland Code School

Jr. Web Development Student   **06/2013 - 08/2013**

- Intensive course built to provide essential skills for Jr. Web Developers.
- Ruby using Zsh and Pry
- HTML & CSS – Bootstrap
- Rails development and TDD.
- Agile Development.
- Able to launch apps with functional user design and hosted live on Heroku.

Professional Experience

28dayhug.com   E-Commerce Website   rails-28dayhug.herokuapp.com

- Migrating an exsisting site from Wordpress to a Rails environment.
- Implementing the payment processor using Stripe API, I learned about building customers, charges, and subscriptions.

ENSearch   Music Search Engine   ensearch.herokuapp.com

- Building ENSearch as a person project to help myself understand Rails better.

DotaMeter.com   Site for Game Statistics   DOTAMeter.com

- Built from the ground up using Rails, AngularJS, and Mongo as our database, DotaMeter.com is a statistic site for the computer game DOTA 2.
- Used Mechanize and Nokogiri to build a script to scrape sites, aggregating data, and built persistent statistics for each Hero of the game.

SW Hack-n-Help Coordinator   June 2013 - Present

- Took over the organizing and coordinating of the SW Hack-n-Help at Lucky Labs in Multnomah Village. Offering a time and place for everyone of all languages to come together and hack.

Albertsons
Service Supervisor   April 2008 - Present

- Employee of the month within the first year.
- Promoted to Supervisor within the second year.

Target

Team Leader   Nov 2005 - Sept 2009
  - Promoted to Team Leader within the second year.
